Approximate and all floor plans and development plans are subject to change. Stated square footages and dimensions are measured to the exterior boundaries of the exterior walls and the centerline of interior demising walls between units and in fact vary from the dimensions and definition of the "Unit" set forth in the Declaration (which generally only includes the interior airspace between the perimeter walls and excludes all interior structural components and other common elements). This method used herein is generally found in sales materials for the Unit, with units in other condominium projects that utilize the same method. Measurements of rooms set forth on this floor plan are generally taken at the furthest points of each given room (as described above and as if the rooms were a perfect rectangle) without regard to the actual shape of the room.
